

DEFENSE AGAINST BLACK MAGIC

The forces of black magic are powerful in Africa. ECKists there ask me, How can we become strong so that no force of Kal, the negative power, can harm us?

First, do not look for trouble or anger anyone who has these powers. But if the powers of darkness are thrown against you, put your full attention on the MAHANTA and sing, or chant, *HU*. See a shining light around you through which no evil can penetrate, and know that the MAHANTA in the form of a Blue Light stands by your side.

Study what *The Shariyat* says about how to overcome the dark forces. [It is important to understand what in your emotions has opened the door for this power to attack.](#)

Always remember that the ECK is stronger than any force in the lower worlds. Only one who surrounds himself with Its presence, and knows that the MAHANTA is with him, will be safe.
